**REVENUES FROM FEDERAL SOURCES**

It is the intent of the Board of School Trustees that its administrators be cognizant of all federal laws intended to provide additional resources for the education of children. The administration is instructed to select those particular parts of the enabling laws which will help the Board of School Trustees to provide better educational opportunities, better educational environment, and better physical and mental growth for each pupil as a result of federal funds.

The Board of School Trustees regards the federal dollars available to local school corporations and communities as a public trust just as if the money came from local tax funds. If the Board approves any particular program in which federal resources can assist and provide a better educational opportunity, this money is to be spent wisely and in accordance with the policies governing the use of other school funds.

Adoption Date:       October 12, 1977
