**FACILITIES DEVELOPMENT GOALS**

The Board of School Trustees has a commitment to seek continued improvement in the quality of the educational program offered to its students. Because of changing needs and the intent of the Board to develop an outstanding educational program, it is imperative that a continuing assessment be made of student needs. Goals for facilities development are basic and instrumental considerations for meeting those needs.

The Board establishes these broad goals for development:

1. To integrate facilities planning with other aspects of planning in a comprehensive program of educational problemsolving.
2. To base educational specifications for school buildings on identifiable student needs.
3. To design for sufficient flexibility to permit program modification, or the installation of new programs.
4. To involve the teaching and administrative staff and available experts in developing plans and specifications.
5. To include in the design of buildings the potentiality for community use.
6. To emphasize the concept of the neighborhood elementary school.
