PILOT PROJECTS

In an awareness of the need for continuing appraisal of alternative programs, the Board, through the Superintendent, establishes a philosophy of applied research for initiating constructive and responsible changes in the schools. Inherent in this objective is the realization that significant changes can **only** result if given time to be nurtured in an environment guarded against premature criticism by the public and the profession.

Pilot programs will be planned on a time table which will allow for valid assessment of program impact.

For purpose of clarification, pilot projects will be described as educational experiments, in a protected environment, for a period sufficient to test the applicability of the experiment for fulfilling present and future needs of the district.

Adoption Date: October 13, 1982
