ENROLLMENT IN COLLEGE COURSES

The Board believes that any student who is capable of and wishes to do college-level work while in high school should be permitted to do so. Students may, with the approval of their principal, enroll in an accredited public or private college or university and earn credits toward high school graduation. A student's enrollment in such a program may not: 1 - delay progress toward graduation; and 2 - cause a high school course of similar nature to be canceled due to lack of enrollment. College courses must be comparable to courses listed by the State Board of Education as applicable toward high school graduation. The amount of credit earned is directed by the state: 1/2 high school credit for 1 or 2 college credit hours; 1 high school credit for 3 or 4 college credit hours; 2 high school credits for 5 college credit hours. High schools will accept the grade reported from the college/university, or a mark of "P" for any grade above an "F" and a mark of "F" for a grade of "F"; the choice of grade or "P/F" will be the students. Credit earned in this fashion will be so indicated on the student transcript. Information about this opportunity will be included in the school student handbook/course curriculum guide. All costs associated with college enrollment are the sole responsibility of the student.

Adoption Date: November 10, 1976; Revised: October 27, 1997
